LIGHT WITH A DIFFERENCE
3 Circuit Track System

Lighting tracks can be used in many and varied applications, from retail stores and art galleries to commercial and residential applications. The advantages of the three-circuit system are its high loading capacity and the flexibility in planning. If lighting requirements change the spotlights can easily be rearranged. Our lighting tracks are designed for easy surface mounting or recessing and can be suspended at any height. Available in 2 metre lengths, the track can be easily cut on site or joined to form longer lengths or configurations.
IP20
